

COMMUNITY HEALTH NEEDS ASSESSMENT IMPLEMENTATION PLAN

CHI St. Vincent Infirmiry

Mission

The mission of Catholic Health Initiatives (CHI) and CHI St. Vincent is to nurture the healing ministry of the Church, supported by education and research. Fidelity to the Gospel urges us to emphasize human dignity and social justice as we create healthier communities.

Community Served

The primary service area was determined by our Strategy and Business Development Office. Using 75% of patient discharges as the threshold, six counties were identified as encompassing the SVI primary service area. These counties include Conway, Faulkner, Lonoke, Perry, Pulaski, and Saline County.

CHI St. Vincent Infirmiry Primary Service Area

COMMUNITY HEALTH NEEDS ASSESSMENT IMPLEMENTATION PLAN

CHI St. Vincent Infirmary

Implementation Strategy Process

The CHNA was presented and reviewed at the June 2016 CHI St. Vincent Health System Board of Directors meeting. Overall priorities were discussed and reviewed with the Board and input received from the board members. In the summer of 2016, the Community Education and Outreach Council (CEOC), consisting of members from the administration, physician enterprise, clinically integrated network, nursing, mission, strategy, marketing & public relations, physician outreach, community health, senior services, foundation and a national CHI Community Outreach representative, met and prioritized the identified health needs. The team subsequently developed a strategy for each prioritized need that was completed in fall of 2016 by the CEOC.

CEOC Members include: Patrick McCrudden, Tiffani Butler, Vicky Sanders, Amy Funderburk, Megan Roberts, Suma Ashok, Jelinda Scott, Maureen Halligan, Gina Seabaugh, Rhonda Higgins, Chad Dillard, Ben Sheppard, Diane Harry, Suzanne Grobmyer, Jennifer Thompson, Nicole Hamilton, Terry Gartin,

Prioritized List of Significant Health Needs Identified in CHNA

The CEOC reviewed the CHNA documents and prioritized the different identified health needs based on quantitative and qualitative data presented in the CHNA, availability of the existing resources within the health system, and the feasibility of impact to the community.

The prioritized health needs include:

- Obesity
- Health Promotion and Education
- Chronic Disease Management
- Latino Health
- Mental Health
- Access to Care
- Senior Health

CHI St. Vincent Infirmary

OTHER IDENTIFIED NEEDS*	<ul style="list-style-type: none"> • Tobacco • Cancer • Women’s Health (Mammography, Pap Smear) • Men’s Health (Colonoscopy, Prostate Specific Antigen Testing) • Infant Mortality • Pre-term Births/Low Birth Weight Babies • Sexually Transmitted Diseases • Severe Housing • Homicides
--------------------------------	--

- ❖ CHI St Vincent addresses many of these needs including tobacco use, cancer, mammography and men’s and women’s health through our hospital and physicians services however we have limited resources and have not chosen these as our areas of focus.
- ❖ CHI St. Vincent does not have the resources to provide an STD program and there are aspects of a STD program which would counter our Ethical and Religious Directives. CHI St. Vincent refers to community programs and services.
- ❖ CHI St. Vincent does not have the resources to address housing needs although we have partnered with Habitat for Humanity to address housing.
- ❖ CHI St. Vincent does work in the area of violence prevention but does not have the resources or expertise to address homicide as a priority focus.
